SCIENTIFIC PROGRAM

www.lets-cidaap.com

Dear Esteemed Colleagues,

Greetings from the Vascular Access Society of India (VASI)!

Following the resounding success of **Let's CiDAAP 5.0** and **PEiRT Bharat 1.0**, we are delighted to announce **Let's CiDAAP 6.0** to be held on **December 20–21, 2024**, at **The Westin Hotel, Gurugram, Delhi-NCR, India**.

Since its inception, Let's CiDAAP has been a distinguished platform for healthcare professionals and industry leaders to exchange knowledge and showcase advancements in peripheral endovascular therapies. This year's theme, **"Unveiling the Future: Where Innovation Meets Technology"** underscores our commitment to fostering collaborative innovations in vascular health.

We anticipate a dynamic assembly of over 25 international experts, 100 national experts, and more than 400 delegates from across the globe.

Our comprehensive two-day program will feature live-recorded cases, keynote lectures, interactive panel discussions, and a Grand Quiz, offering the highest level of interactive education.

CiDAAP 6.0 @2024 will cover almost all the critical topics such as Pulmonary embolism, DVT, PAD, dialysis access, aortic aneurysms, critical limb ischemia, advanced venous interventions, and more.

In alignment with recent advancements, this year's conference will place a special focus on mechanical thrombectomy devices, which have revolutionized the treatment of acute limb ischemia and deep vein thrombosis & Pulmonary Embolism. Traditional treatments for these conditions have often relied on surgical options like conventional thrombectomy for arterial occlusions and anticoagulation for venous conditions. However, there has been a significant shift towards percutaneous mechanical thrombectomy techniques.

The Asian subcontinent has been fortunate to witness the introduction of multiple mechanical thrombectomy devices such as CAVT (CAT12 &16), AngioJet, Inari, and the soon-to-be-introduced devices like Rotarex & Aspirex, Jet-i, Diamondback 360, Jet-Stream. At CiDAAP, we have always championed the integration of new technologies, providing healthcare professionals with hands-on experiences and insights from global experts to incorporate these practices into local healthcare settings, thereby significantly benefiting patients.

Highlights of Let's CiDAAP 6.0 include:

- Master MSK Embo with Dr. Okuno (Japan)
- Master PAE/GAE/HAE with Dr. Bagla (USA)
- Master PAD with Dr. Ysa (SPAIN)
- Multiple Workshops on Latest Mechanical Thrombectomy Devices (Arterial, Venous & Pulmonary).
- Workshops Featuring Step by step approach
- Expert-Led Sessions on:
 - Closure Devices
 - Suturing Techniques
 - Physician-Modified Fenestration of Endografts.
- In-Depth Discussions with KOL.
- Perspectives from VS, IR, & Cardiologists (Holistic View).
- Case Based Presentations (Learn from the Mistakes made by Experts).

We are pleased to invite you to join us at this prestigious event as a delegate. This conference offers an unparalleled opportunity to engage with global experts, gain practical experience, and participate in enriching discussions on the forefront of vascular health advancements. Given the focused nature of this event, we are limiting registrations to ensure a high-quality, interactive experience.

To secure your participation at this transformative event, please register at the earliest. For any inquiries regarding participation or specific options, kindly contact the organizing committee at letscidaap@gmail.com

We look forward to your enthusiastic participation and to making **Let's CiDAAP 6.0** a grand success.

Warm regards

**Dr. Rajiv

Don't miss the opportunity to meet In-person with Stalwarts

Gain expertise in Percutaneous Pulmonary Thrombectomy & Dialysis Access through a detailed learning experience with renowned International Masters Dr. Bart Dolmatch

Dr. Bart Dolmatch

Interventional Radiologist
at The Palo Alto Medical Foundation

Dr. Sanjeeva Kalva of the USA. These seasoned experts will impart their vast knowledge on VTE, advanced venous interventions and Obviously Controversies In Dialysis Access.

Dr. Sanjeeva Kalva

Professor of Radiology and Vice Chair of Image-Guided Interventions, University of Texas Southwestern Medical Center Dallas, TX

Dr. Rachel Rosovsky

Hematologist, Expert in Thrombosis(PE/DVT) and Hemostasis. President, Pulmonary Embolism Response Team (PERT) Consortium

Don't miss the exclusive opportunity to interact with Dr. Rachel Rosovsky, the pioneering force behind the PERT concept at MGH in Boston, USA. As the current President of the PERT Consortium in the USA, she brings a wealth of experience as Director of Thrombosis Research at Massachusetts General Hospital and Associate Professor of Medicine at Harvard Medical School.

Dr. August YSA

Vascular and Endovascular Surgeon. FEBVS Hospital de Cruces. Barakaldo

Experience the unparalleled expertise of Dr. Augusto Ysa from Spain in PAD extreme interventions, Shockwave Lithotripsy, Deep Vein arterialization and atherectomies. Dr. Ysa is a master in extreme Recanalization for PAD and has curated a comprehensive session on PAD interventions for all participants.

Dr. Yuji Okuno

Chief Director OKUNO Clinic Developing and disseminating MSK Embolization

Dr. Yuji Okuno, may also join us and share his magical experience on pain & embolization. He is Chief Director OKUNO CLINIC | Developing and disseminating MSK Embolization, TAME treatment, a new treatment for chronic pain (Okuno Method)
